

Santiago Salazar Guzman

Full-stack developer

Neiva, Huila

mignize@gmail.com

I am a developer with 3 years and 10 months of experience, currently 19 years old. From a very young age, I self-taught myself, which allowed me to acquire advanced knowledge and land my first job, where I was able to further develop my technical skills. Throughout my career, I have worked on the development of new features, infrastructure optimization, and have made strategic technology-related decisions. Additionally, I have directly collaborated with clients to meet their technological needs and have led small teams in implementing the required solutions. I consider myself proactive, with a strong ability to learn and a genuine interest in continuously acquiring new knowledge.

Work Experience

Full Stack Developer

Gamefort

January 2023 - Currently

Develop and implement new features, optimize functionalities, and make strategic decisions on infrastructure improvements. Lead the design and implementation of solutions aligned with business goals and needs.
