

Santiago Salazar Guzmán

Full-Stack developer

Neiva, Huila

mignize@gmail.com

Stack: React.js, Next.js, Node.js, PostgreSQL, MongoDB, Git, CI/CD, ArgoCD, Docker, GraphQL, REST, Typescript, Redux

I'm a developer with over 4 years of experience. From a young age, I was self-taught, which allowed me to acquire advanced knowledge and land my first job, where I was able to further develop my technical skills. Throughout my career, I've worked on developing new features, optimizing infrastructure, and making strategic technology decisions. I've also collaborated directly with clients to address their technological needs and have led small teams in implementing the required technical solutions. I consider myself proactive, with a strong ability to learn and a deep interest in continuously acquiring new knowledge.

Work Experience

Full-Stack Developer

Gamefort

January 2023 - March 2025

- Developed and implemented new features aligned with development objectives.
- Contributed to decision-making on infrastructure changes and the adoption of new technologies.
- Optimized and fixed existing functionalities.
- Supported the onboarding and integration of new developers into the team.
- Addressed client needs when aligned with company goals.
- Created user interfaces focused on optimizing the user experience.
- Provided ongoing support for site maintenance, improvement, and updates based on project requirements.
- Managed databases, optimizing queries and performance.
- Identified and resolved bugs across both frontend and backend.
- Assisted junior developers with technical guidance and troubleshooting.

Developer

Torneos.GG S.A.S

January 2021 - January 2023

- Created new features and developed web applications with a focus on delivering clean, scalable, and maintainable code. Followed best practices for both frontend and backend development to ensure robust and user-friendly implementations.
- Performed manual testing to ensure the functionality and performance of developed features.
- Optimized and corrected existing features.
- Managed databases.
- Developed APIs
- Provided ongoing support for project maintenance, enhancements, and updates according to evolving needs.

Education

- Diploma in Programming Fundamentals with Python, Universidad Tecnológica de Pereira, Online
April 2022 - July 2022
- Diploma in Basic Programming with Java, Universidad Tecnológica de Pereira, Online
July 2022 - September 2022
- Diploma in Software Development, Universidad Tecnológica de Pereira, Online
September 2022 - October 2022
- Diploma in Web Application Development, Universidad Tecnológica de Pereira, Online
October 2022 - November 2022

Skills and knowledge

- Typescript (4 years)
- Javascript (4 years)
- MongoDB (4 years)
- Next.js (4 years)
- React.js (4 years)
- Project management tools (4 years)
- Git (4 years)
- PostgreSQL (3 years)
- Redux (3 years)
- GraphQL (3 years)
- Microservices Architecture (2 years)
- Event-Driven Architecture (2 years)
- ArgoCD (2 years)
- Github Actions (2 years)
- TurboRepo (2 years)
- Docker (2 years)
